PROJECTS

1. Student Innovation – Scholarship Support Platform

Tech Stack: HTML, CSS, Python

Web-based platform connecting donors with financially disadvantaged students to provide scholarship and tuition aid.

- Enables students to register, submit academic/financial details, and apply for scholarships seamlessly.
- Built application verification and transparent fund distribution features for efficiency and trust.
- Bridges the gap between aid providers and students to eliminate financial barriers to education.

2. Digital Platform for Empowering Local Artisans

Tech Stack: HTML, CSS, Python

Web platform enabling rural artisans to showcase and sell handmade products directly to buyers without middlemen.

- Conducted village awareness seminars to educate artisans on digital selling and online marketplaces.
- Developed product listing, image upload, pricing, and direct contact features for buyers and sellers.
- Increased artisan income potential by removing intermediaries through a transparent digital storefront.

INTERESTS

- Emerging web technologies and AI/ML trends
- Social innovation and community impact projects
- Rural digital literacy and empowerment
- Volleyball, travelling & cultural exploration
